UN PAVIMENTO, MÚLTIPLES APLICACIONES

Slip-stop, el nuevo porcelánico antideslizante de Aplana, combina de manera perfecta, rendimiento estética y versatilidad. Una única textura, suave y fácil de limpiar, perfecta para cualquier pavimento, y con altas prestaciones antideslizantes.

- Antideslizante con una suave y agradable textura
- Fácil limpieza y sin ningún mantenimiento adicional
- Sin cambios entre diferentes espacios de interior, exterior, o zonas húmedas
- Multitud de formatos y acabados estéticos, para todos los gustos
- No necesita colocaciones especiales
- Resistente al hielo, a los ataques químicos y a los agentes atmosféricos
- Mantiene inalteradas en el tiempo sus excepcionales calidades técnicas

ONE FLOOR TILE, MULTIPLE APPLICATIONS

Slip-stop, the new Aplana anti-slip porcelain tile, combines, in the best possible ways, performance, esthetic and adaptability. Only one texture, soft, smooth and easy to clean, perfect for any floor tile, with high anti-slip performances.

- Anti slip with a soft and pleasant texture
- Fast and easy cleaning, with no additional maintenance
- No changes from indoor to outdoor or to wet and humid areas
- Various sizes and aesthetic finishes for infinite types of preferences
- No special laying
- Frost proof and chemical products resistance
- Characteristics remain unchanged in time

CARACTERÍSTICAS TÉCNICAS TECHNICAL FEATURES	NORMA REGULATION	VALOR PRESCRITO VALUE REQUIRED	VALOR MEDIO AVERAGE VALUE

La colección STARLIGHT de Aplana está trabajada con granillas pulidas.

Se trata de un compuesto vítreo puro que se aplica sobre la superficie cerámica en forma de gel. Este vehículo húmedo facilita el fundido del vidrio convirtiéndolo en una capa continua y compacta.

El pulido de nuestro material se realiza mediante un mecanizado a partir de abrasivos diamantados de diferentes granulometrías.

Tras el proceso de pulido la estructura físico-química de la granilla permanece compacta. Presenta altos niveles de impermeabilidad. No necesita tratamiento de sellado posterior.

No obstante, Aplana aplica tras el pulido un tratamiento especial para terminar de sellar la superficie, asegurando la limpieza y durabilidad de nuestra cerámica pulida. Este tratamiento no pierde su efectividad con el paso del tiempo.

Además de valores estéticos, tales como la calidad del brillo, la transparencia de los colores y la definición gráfica, la gran diferencia entre la granilla pulida de la serie Starlight y el esmalte pulido, es la bajísima porosidad que impide la penetrabilidad de partículas en la superficie, por lo que su grado de limpieza y mantenimiento está garantizado.

Aplana's STARLIGHT collection is worked with polished grits. It is a pure vitreous compound that is applied to the ceramic surface in the form of a gel. This wet vehicle facilitates the melting of the glass, turning it into a continuous and compact layer.

The polishing of our material is carried out by machining from diamond abrasives of different granulometries.

After the polishing process, the physical-chemical structure of the grit remains compact. It presents high levels of impermeability. No need for post-sealing treatment.

However, Aplana applies a special treatment after polishing to finish sealing the surface, ensuring the cleanliness and durability of our polished ceramic. This treatment does not lose its effectiveness over time.

In addition to aesthetic values, such as the quality of the gloss, the transparency of the colors and the graphic definition, the great difference between the polished grit of the Starlight series and the polished enamel, is the very low porosity that prevents the penetrability of particles in the surface, so its degree of cleanliness and maintenance is guaranteed.
